Description

passwd struct inside crystax-ndk looks like:

```
struct passwd
{
char* pw_name;
char* pw_passwd;
uid_t pw_uid;
gid_t pw_gid;
char* pw_dir;
char* pw_shell;
};
```

At the same time for desktop platforms this struct usually looks like the following:

```
struct passwd
{
char* pw_name;
char* pw_passwd;
__uid_t pw_uid;
__gid_t pw_gid;
char* pw_gecos;
char* pw_dir;
char* pw_shell;
};
```

So 'pw_gecos' field is missing,
as result it gives some obstacles to port python3 for Android
