

CrystaX NDK - Task #1083

Use blocks runtime implementation from GNUstep libobjc2

10/02/2015 12:00 AM - Dmitry Moskalchuk

Status:	Open	Start date:	10/01/2015
Priority:	Normal	Due date:	
Assignee:	Dmitry Moskalchuk	% Done:	0%

Target version:	11.0.0	Toolchain:	
CPU Architecture:		Android version:	
Host OS:			

Description

Right now we have blocks runtime linked into libcrystax; this is implementation taken from compiler-rt repository. For consistency, we should remove it from libcrystax, and build one in GNUstep libobjc2.
